

JOB COMPLETION REPORT

INVESTIGATIONS PROJECTS

State of Montana

Project No. F-8-R-1 Work Plan No. II Job No. II-B

Title of Job: Location of Foodstuffs Available in Montana for Hatchery Diets.

Objectives:

To find sources of economical and nutritious foods that may be used to provide balanced hatchery trout diets.

No work has been done on this job as it was considered more important to develop the library on trout disease and nutrition and work with experimental diets and treatments on the Arlee hatchery fingerling trout which have been suffering heavy mortalities since the first week of May of this year.
